KRONES colclean Cleaning Agents

KRONES colclean C 1201

- Cleaning agent on the basis of citrus and orange terpenes
- Removes hotmelt contaminations from surfaces of the labellers and packaging machines
- Owing to the low corrosiveness against plastics and coatings, KRONES colclean C 1201 is especially suitable for cleaning gripper cylinders and vacuum bars.

KRONES colclean EV 60

- Mineral oil based cold cleaning agent
- Removes hotmelt contaminations from surfaces of the labellers and packaging machines
- Optimally suitable for large surfaces and tough contaminations

KRONES colclean Cleaning Oil

- Soy bean oil based cleaning agent
- Cleans glue containers of labellers and packaging machines
- Removes well any EVA based adhesives
- Suitable for nozzle, wheel, and roller application systems working with hotmelt

KRONES colclean Hotclean UV

- White oil based cleaning agent
- For cleaning glue containers of labellers and packaging machines
- Especially suitable for the use with rubber and polyolefin hotmelts
- Suitable for nozzle, wheel, and roller application systems

KRONES colclean Wet

- Tenside based liquid cleaning agent
- Powerfull cleaning of cold glue pollution
- Easy removal of glue from all surfaces, labelling pallets and glue roller.
