

## Technical data sheet

**KRONES colclean FC 4001****Acidic foam cleaner for the food&beverage industry****Product description and application**

KRONES colclean FC 4001 is a concentrated acidic foam cleaner with peracetic acid as cleaning booster and disinfectant. It is suitable also for high water hardness. KRONES colclean FC 4001 is used as general cleaner in all areas of the food and beverage industry. It is designed for foam cleaning of surfaces, as well as the exterior cleaning of bottling and production facilities, conveyors, containers and implements. Its stable foam provides good coverage, excellent removal of mineral scaling and ease of rinsing even on vertical surfaces and hard to reach areas. For industrial use only.

**Operating conditions**

Concentration:	1 – 5%
Dosing:	manually or via special dosing equipment
Temperature:	cold to 50°C
Contact time:	15 to 30min

**Concentration check**

Titration of p-value

**Physical data**

Form/colour/smell:	liquid, colourless to yellowish, characteristic
pH value:	highly acidic
Density:	approx. 1.05g/cm <sup>3</sup>
Flash point:	-
Foaming:	highly foaming, foam cleaner
Temperature stability:	stable at 5 to +40°C
Conductivity (in deionised water):	-

**Material compatibility**

Compatible in the working concentration with all common materials in food industry like: Stainless steel, glass, PET, PE, PP, PVC, PVDF, PTFE, Viton, EPDM.

Incompatible to Aluminium, colored metal, zinc-coated or tin-coated surfaces.

At the same time, however, the possibility of material incompatibilities cannot be completely ruled out. We recommend to carry out appropriate tests in case of uncertainty.

**Storage/ Shelf life**

The product should be stored sealed in the original container in a cool, well ventilated place.  
Minimum shelf life: 18 months.

**Classification**

Please refer to the corresponding safety data sheet for details on:

Hazardous Information  
Transport Regulations  
Safety Regulations

**Disposal**

Recycling of packaging only fully emptied and closed.

Any product residues must be disposed of in accordance with local regulations. For further information, please refer to our safety data sheet.

**Further information**

Contains: Acetic acid, hydrogen peroxide, peracetic acid  
Ingredients according to EC regulation 648/2004  
<10%: nonionic surfactants  
See EC safety data sheet

**Special instructions**

Rinse with sufficient amount of drinking water, to avoid any residues on surfaces, which could come into contact with foodstuff. Use biocides safely. Always read the label and product information before use. Product contains 1,2g peracetic acid and 5.9g hydrogen peroxide per 100g.  
Due to possible incompatibilities with other products, it is recommended to rinse dosing equipment (pumps, pipes) thoroughly with water prior to a change-over to KRONES colclean FC 4001.
