Example: Filling beer in returnable glass bottles

Our services offered

Know-how for your efficient production

Technical Consulting
incl. product recommendation
depending on application

Lubricant consulting
Lubrication schedule/instructions
and overview of lubricants

Hygienic concept
solution-oriented and
customer-specific

Laboratory tests
on customer request

Our service does not end
with the product.

**We keep an eye on
your entire line.**

Your back-up

for an efficient and smooth lubrication process

Unique in the industry – the Krones and KIC Krones ID number system:

- **Fix ID numbers:**
The lubricant and the associated lubrication points are clearly marked until the end of the machine's service life.
- **Clear assignment:**
Simply compare the ID number of the product and lubrication point – if they match, you know that the correct product is being used.
- **Easy to find:**
ID numbers are provided on every Krones machine, every lubricant container and in the Time2Lubrify App.

Our own laboratory and technical centre

Product and material tests

More than 50 different state-of-the-art test procedures for the qualification of our consumables as well as continuous expansion and adjustment of test procedures and services

Product-specific quality control

Regular inspection of the technical parameters of our products

Technical product recommendation

Based on your individual requirements

Innovation and development

KRONES RUNS BEST WITH KRONES

The KIC Krones product portfolio is constantly growing in line with the new developments and new technologies of the Krones Group. This leads us together to achieving the goals anchored in the Krones mission statement, namely to create solutions for feeding the world's population, combating climate change, and using packaging materials responsibly.

Certified quality

Our seals and certifications:

* In NSF White Book™ you will find the complete list of the registered products.

** For the following scope of application: Development, distribution, service and trade of substances and products for the operation of machines and lines for the beverage and food industry

We place particular emphasis on the high, consistent quality of our products, as our seals and certifications confirm.

What drives us

Sustainability goals 2030

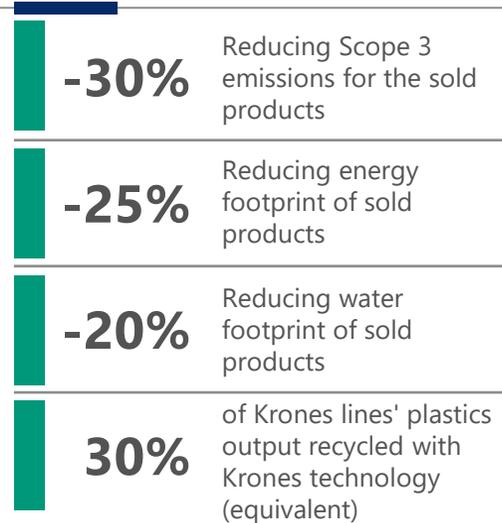

Upstream value chain

Own operations

Downstream value chain

12 KPIs in ESG (Environmental, Social, Governance) for directing sustainability along the value chain until 2030

Until 2040

NET-ZERO

Emissions along the entire value chain

Our strengths

Summarised and very concrete
