

Krones runs best with Krones

KIC Krones – your specialist for operating supplies

 **KIC KRONES**

Full-range provider specialised in operating supplies and services in the beverage and liquid-food industry

Subsidiary of **Krones AG** based in Neutraubling, Germany

Broad application know-how of Krones machines and third-party machines

Individual product consultation and therefore perfectly coordinated **overall solution**

KIC Krones – your partner worldwide

KIC Krones in figures

We at KIC Krones are represented in **66** subsidiaries and representative offices of Krones AG to ensure sales in **156** countries.

● Agents and trade representatives ● Headquarters ● Krones subsidiaries and representative offices

Who we work for

For companies from these industries

Water
Yoghurt
Milk
Beer
Wine
Water
Soft drinks
Liquid food
Pharmaceuticals
Dairy products

Our products

Our classics: Gluing – Lubricating – Cleaning

Krones colfix

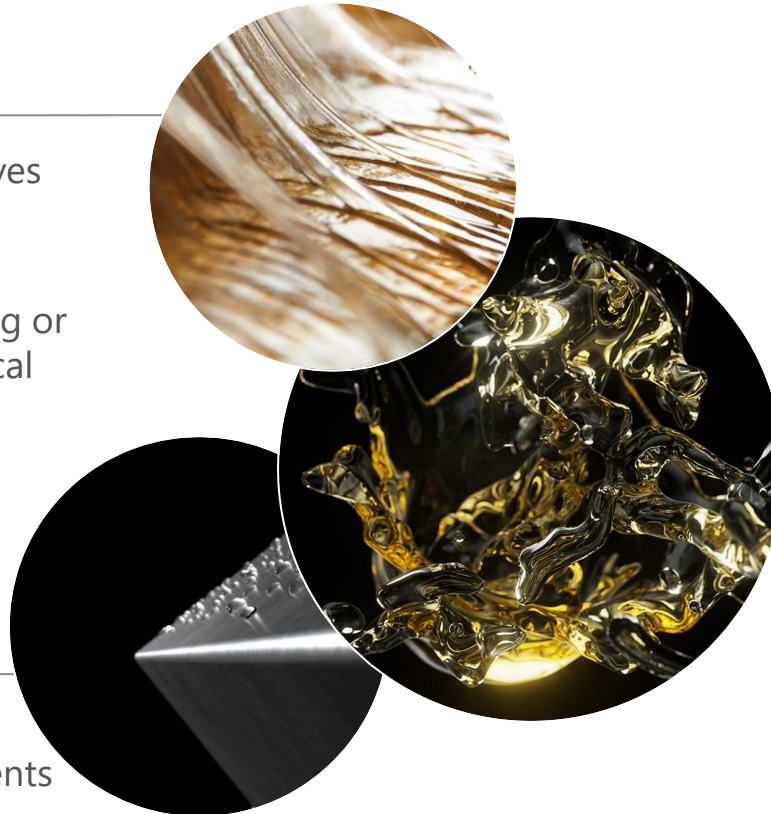

Labelling and packaging adhesives

- The best choice: Optimally adjusted adhesives for every application
- Selection of the perfect adhesive for your requirements by means of on-site consulting or tests in our in-house laboratory and technical centre

Krones colclean

Detergents and disinfectants

- Reduction of the cleaning time and saved costs thanks to highly efficient cleaning agents
- Reliable, constant cleaning quality

Krones celerol

Lubricants

- Increase machine service life through high-quality lubricants (reduction of wear)
- Unique ID number system for unambiguous assignment of the proper lubricant to the lubrication point
- Specified and approved by Krones

Our products

Our expanded know-how

Krones hydrocare

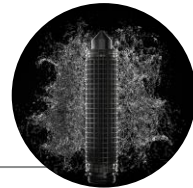

Water treatment materials

- Reliably remove all undesirable substances from untreated water, for example undissolved solids, chlorine, bacteria, viruses, etc.
- Are selected based on the regionally varying conditions and untreated water quality
- Satisfy the high standard demanded by the food and beverage industry
- Are ideally adjusted to Krones systems technology

Krones certuris

Filter elements

- Maximum safety for your products, processes and machines
- Increased service life of your machines and minimum maintenance costs
- Tested and approved by Krones for optimised performance and maximum operational efficiency

Time2Lubrify

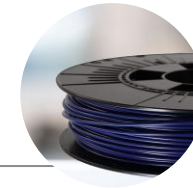

Digitalized lubrication schedules

- Overview of all lubrications updated daily in the software → This results in less downtime thanks to regular and effective lubrication
- Documentary evidence for ISO 9001, no additional documentation required

Krones creadditive

3D printing materials

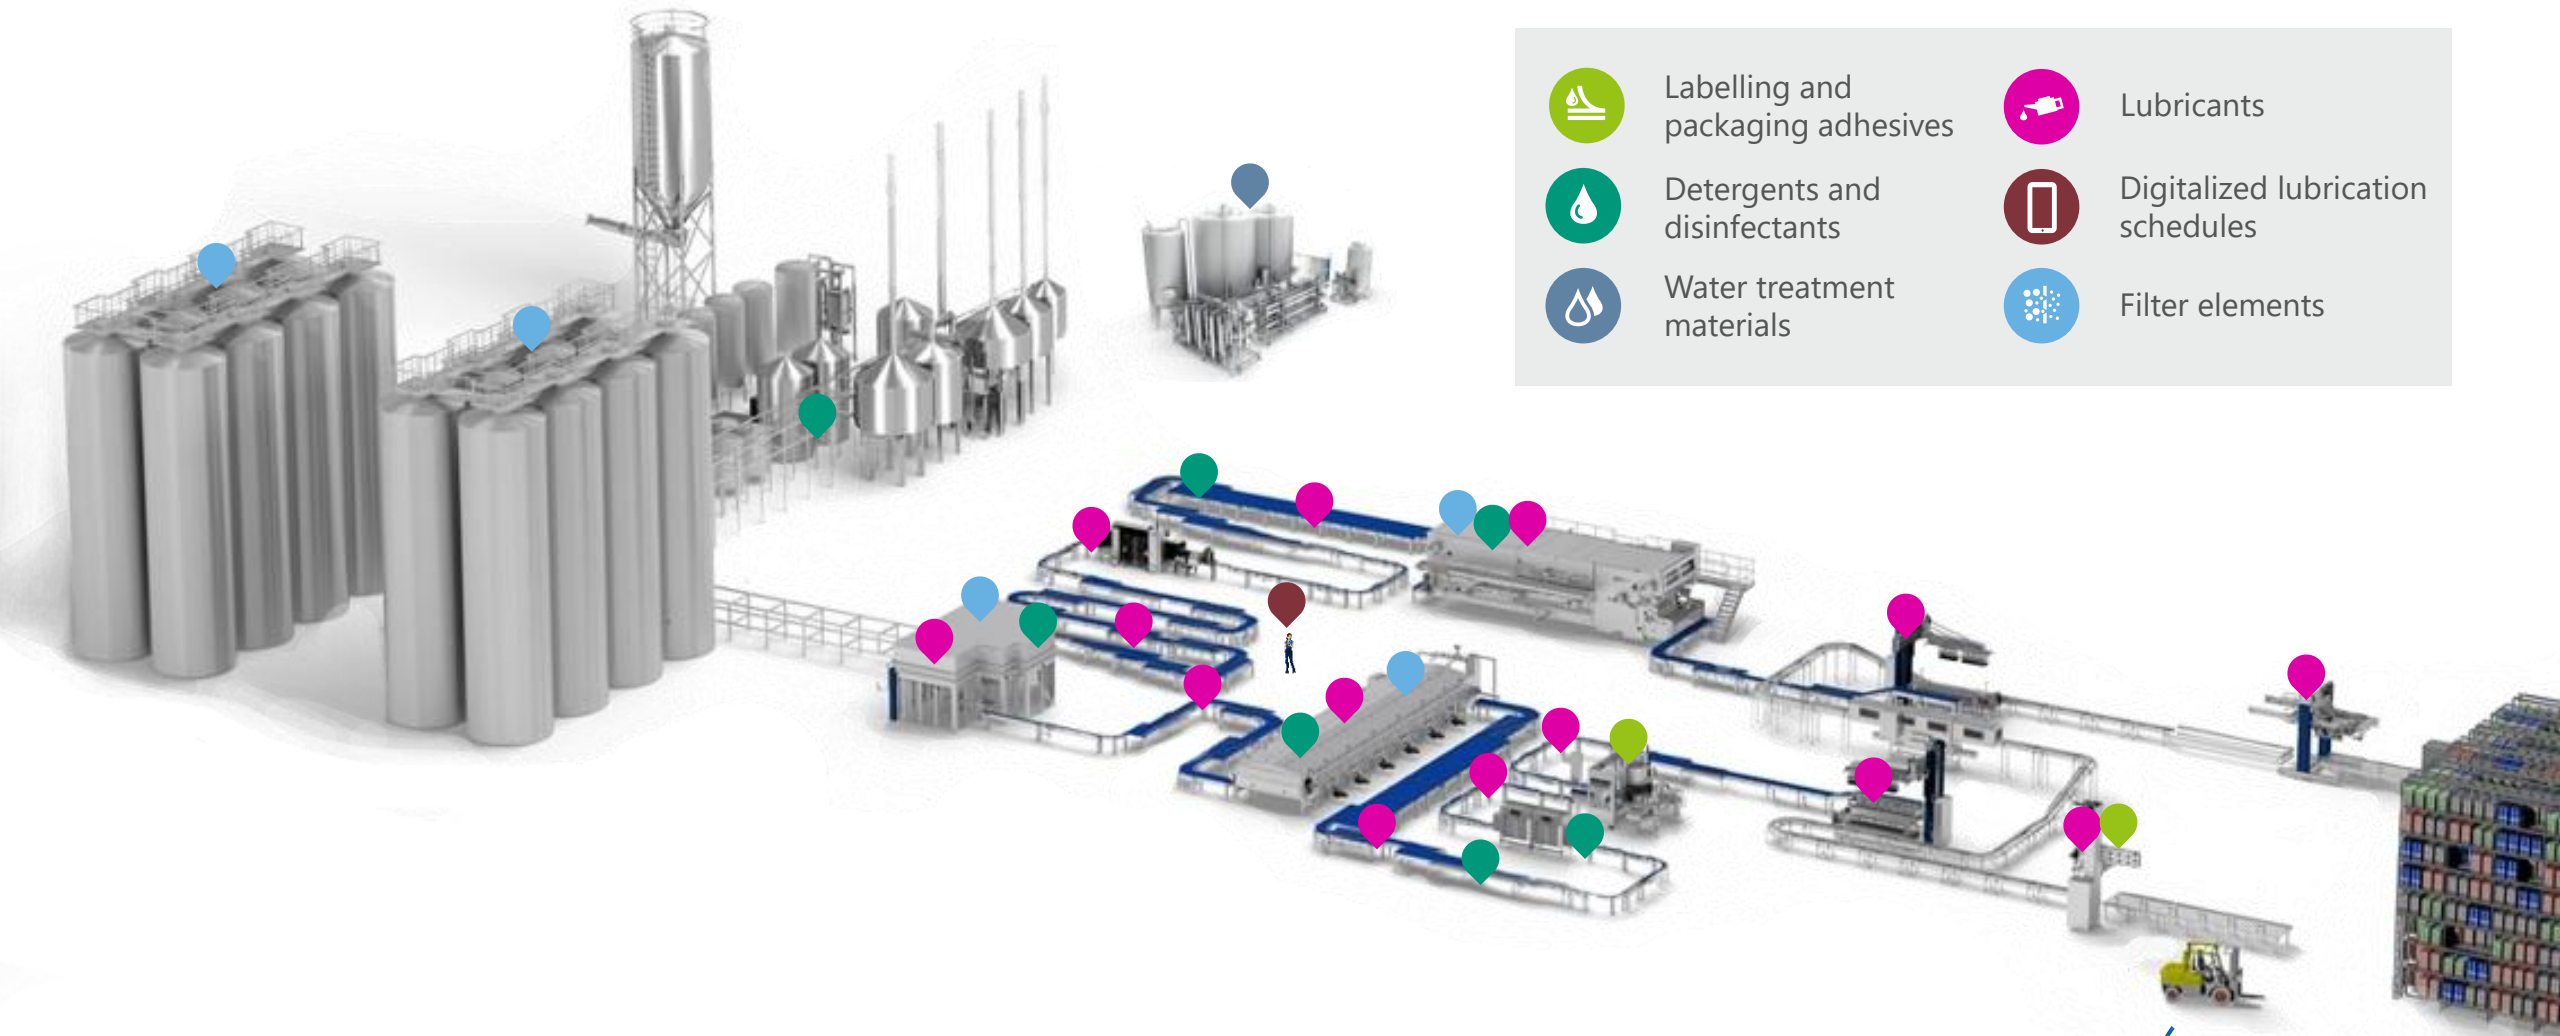

- Enables the printing of qualified spare parts for Krones machines
- Especially developed for the requirements of additive manufacturing according to the FDM procedure

In order to be able to supply our customers with the best products in the long term, we rely on a **broad and innovative product portfolio** that is constantly being developed and expanded.

Our field of application

Our products are in use throughout the entire Krones line

Labelling and
packaging adhesives

Lubricants

Detergents and
disinfectants

Digitalized lubrication
schedules

Water treatment
materials

Filter elements

Our services

Know-how for your efficient production

Services for adhesives

- Optimisation of the adhesive settings (application quantity/temperature) for the particular application
- Evaluation of the labelling result container/label/adhesive (if required additional test in our in-house technical centre)

Services for detergents

- Production starts on site with consultation regarding the product selection
- Creation of a hygiene plan based on the local conditions
- Regular service visits by application engineers
- Hygiene and hazardous substances training

Services for lubricants

- Registration of all lubrication points at Krones lines and comparison to the lubrication instructions of the operating manuals
- Comparison, inspection and, if required, completion of the lubrication point marks (KIC Krones ID numbers) at the lubrication points
- Supply of lubrication schedules and lubricant overviews

Services for filter elements

- Overview of your required filter elements
- Forward-looking recommendation for replacement

Our own laboratory and technical centre

Individual product recommendations and continuous innovations

Product and material tests

More than 50 different state-of-the-art test procedures for the qualification of our operating supplies as well as continuous expansion and adjustment of test procedures and services

Technical product recommendation

Based on your individual requirements

Product-specific quality control

Regular inspection of the technical parameters of our products

Your back-up

for an efficient and smooth lubrication process

Unique in the industry – the Krones and KIC Krones ID number system:

- **Fix ID numbers:**
The lubricant and the associated lubrication points are clearly marked until the end of the machine's service life.
- **Clear assignment:**
If the ID numbers of the product and lubrication point match, you know that the correct product is being used.
- **Easy to find:**
ID numbers are usually provided on every Krones machine, every lubricant container and in the Time2Lubrify software.

Innovation and development

Together with you into a sustainable future

Circular economy

(e. g. washable adhesives)

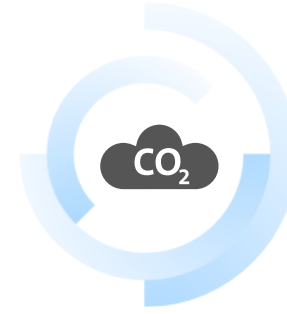

Reduction of the CO₂ footprint

(e. g. low-temperature adhesives, fully synthetic adhesives)

Recyclability

(e. g. retunable PET and glass bottles, adhesives for labels made of recycled paper, LitePac Top tertiary packaging)

Reduction and prevention of packaging waste

(e. g. pallet stabilising system, sustainable packaging solutions)

Climate change

(e. g. bio-based adhesives, biodegradable)

Our strengths

Summarised and very concrete

Worldwide product availability

- Large number of certified production capacities
- Assured availability even in the event of a production system failure
- Worldwide warehouse locations for minimum delivery times

Technical professional skills

- Extensive industry expertise in machinery and operating supplies
- Large network of experts
- Short communication channels within the Group

Operating supplies from a single source

- Suitable for the entire filling industry
- Perfectly matched with Krones machines

Broad product portfolio

- The right product in all product areas and for every application
- High-quality products for Krones machines and also for third-party machines

Partnership-based collaboration

- Between KIC Krones and its customers
- Joint optimisation of your line efficiency
 - Improvement of the production processes

**SOLUTIONS
BEYOND
TOMORROW**
