

Technical data sheet

KRONES colclean CG 4007**Chain lubricant for the food and beverage industry****Product description and application**

KRONES colclean CG 4007 is a concentrated chain lubricant for optimised bottle conveying of PET containers and cans on metal and plastic belts. KRONES colclean CG 4007 is free of silicones and Teflon. It is applied undiluted on the conveyers with a special dosing equipment. KRONES colclean CG 4007 provides excellent lubrication, does not dry on the conveyors and can be washed off easily with water. For industrial use only.

Operating conditions

| | |
|----------------|----------------------------------|
| Concentration: | ready to use |
| Dosing: | automatically with dosing system |
| Temperature: | given |

Concentration check

Not applicable

Physical data

| | |
|------------------------------------|---------------------------------|
| Form/colour/smell: | colourless to yellowish, clear |
| pH value: | approx. 8 |
| Density: | approx. 1.060 g/cm ³ |
| Flash point: | - |
| Foaming: | non foaming |
| Temperature stability: | stable at 5 to +40°C |
| Conductivity (in deionised water): | - |

Material compatibility

Compatible in the working concentration with all common materials in food industry like: Stainless steel, glass, PET, PE, PP, PVC, PVDF, PTFE, Viton, EPDM.

At the same time, however, the possibility of material incompatibilities cannot be completely ruled out. We recommend to carry out appropriate tests in case of uncertainty.

Storage/ Shelf life

The product should be stored sealed in the original container in a cool, well ventilated place.

Minimum shelf life: 3 years.

Classification

Please refer to the corresponding safety data sheet for details on:

Hazardous Information

Transport Regulations

Safety Regulations

Disposal

Recycling of packaging only fully emptied and closed.

Any product residues must be disposed of in accordance with local regulations. For further information, please refer to our safety data sheet.

Further information

Ingredients according to EC regulation 648/2004

5-<15%:anionic surfactants
See EC safety data sheet

Special instructions

Rinse with sufficient amount of drinking water, to avoid any residues on surfaces, which could come into contact with foodstuff.

Due to possible incompatibilities with other products, it is recommended to rinse dosing equipment (pumps, pipes) thoroughly with water prior to a change-over to KRONES colclean CG 4007.

This version of the technical data sheet supersedes all previous versions, which thereby become invalid.

All information and recommendations are based to the best of our knowledge on the latest state of the art in technology and our experience and do not constitute a contractual relationship. All references to DIN standards are for product description purposes only and do not constitute a guarantee.

Processing and material quantities need to be adjusted to account for local conditions. In the event of problems, please seek technical advice. Subject to changes.
